INSTALLATION MANUAL

Embedded down light

Important Safety instructions

Please read this installation guide before attempting to install
The power supply must be turned off before installation.
Before installation, consult a qualified electrician

Follow the following safety precautions for installation:

1. Before any installation or maintenance, turn off the power supply or fuse of the junction box;
2. Do not exceed the input voltage or ampere rate of the power supply;
3. Maintenance of lamps should be carried out by professional electricians, and it is recommended to conduct regular security check and maintenance of lines;
4. Wear rubber soled shoes and work on strong wood or non-conductive ladders.
5. Installation of lighting products must comply with US electrical codes and local building standards;
6. During installation, check the operating environment requirements of the product.
7. This manual does not cover all details or faults of the product equipment, nor does it provide all possible accidents related to installation operation or maintenance. If you need further information or special problems, please contact the technical team;

⚠ CAUTION

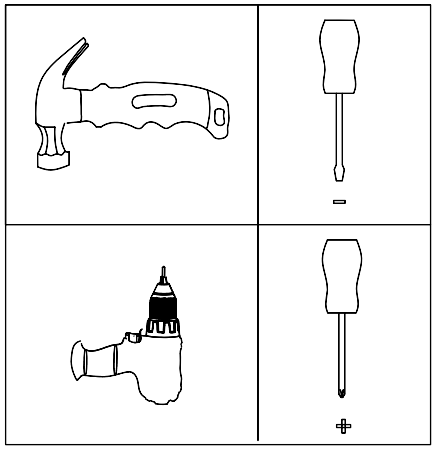

These devices should only be installed by qualified personnel. Installation must comply with the current National Electrical Code (NEC) and all state and local code standards used. Final installation must be approved by an appropriate, qualified electrical/building inspector. Improper installation may result in fire or electrical hazards.

⚠ WARNING

Before installing the electrical system, ensure that the power supply of the circuit is switched on.

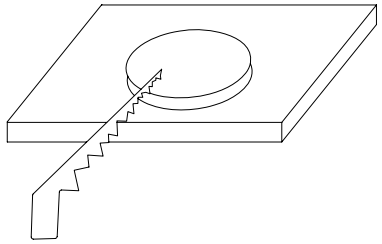

- The risk of fire, most buildings before 1985 (residential) were rated to 60°;
- Consult an electrician before installation;
- Correctly grounded electrical housing;
- In order to prevent damage or wear, do not expose the wire to the edge of other sharp tools;

TOOL

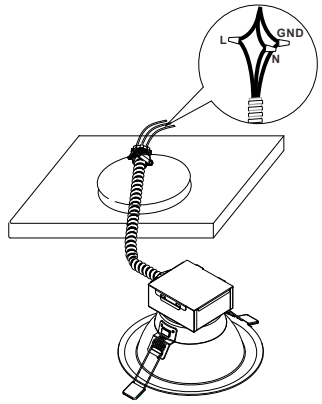

Installation steps

①

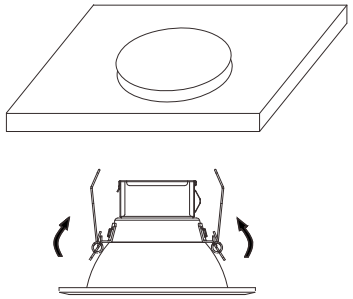

Step one:
Use professional tools to check the hole location matching the product model and open holes on the ceiling.

②

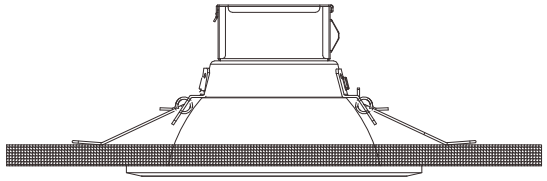

Step 2:
Connection of input line of lamps, as shown in the figure:

③

Step 3:
Use the spring clip, pointing upwards, as shown in the picture:

④

Step four:
Installation of lamps is completed, as shown in the figure
